

- 1** 這些食物都指向碳水化合物！
These foods all point to carbohydrates!

- 2** 看見麵包，就要想到碳水化合物。
When you see bread, think carbohydrates.

- 3** 穀物和馬鈴薯也是碳水化合物線索。
Grains and potato are carbohydrate clues too.

- 4** 香蕉和甜水果同樣代表碳水化合物。
Banana and sweet fruit also mean carbohydrates.

- 5** 麵包、穀物、馬鈴薯、香蕉、甜水果 = 碳水化合物。
Bread, grains, potato, banana, sweet fruit = carbohydrates.

- 6** 題目出現這些食物，多半在考碳水化合物！
If these foods appear, the question is probably testing carbohydrates!

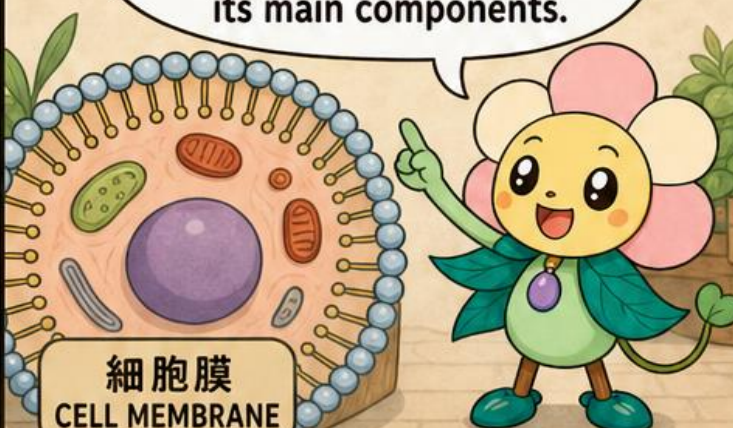

麵包 / 穀物 / 馬鈴薯 / 香蕉 / 甜水果 → 碳水化合物
Bread, grains, potato, banana, sweet fruit → carbohydrates

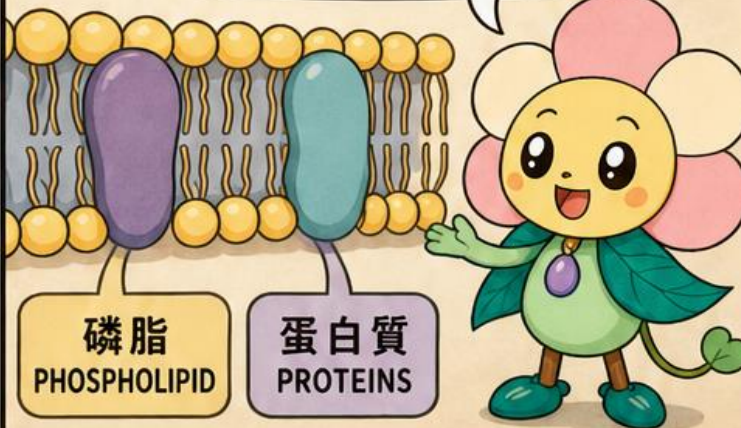

脂質食物 / 脫脂牛奶 = 不含脂質 /
Lipid foods / skimmed milk = no lipid

1 題目若說細胞膜，
要想它的主要成分。
If the question says
cell membrane, think about
its main components.

細胞膜
CELL MEMBRANE

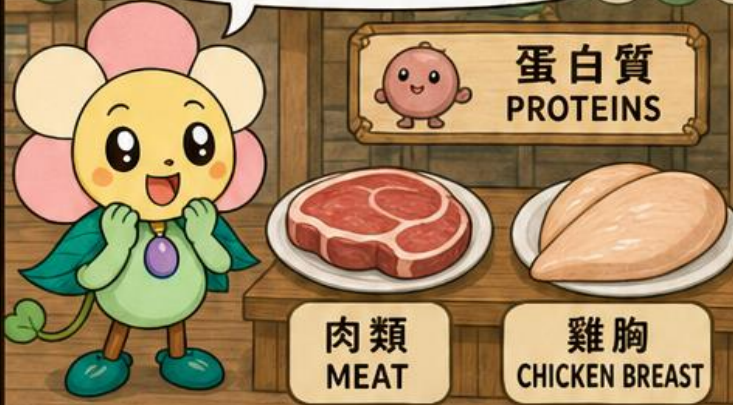

2 細胞膜主要是磷脂加蛋白質。
A cell membrane is mainly
phospholipid plus proteins.

磷脂
PHOSPHOLIPID

蛋白質
PROTEINS

3 肉類和雞胸是蛋白質線索。
Meat and chicken breast
are protein clues.

蛋白質
PROTEINS

肉類
MEAT

雞胸
CHICKEN BREAST

4 蛋白粉和牛奶也代表蛋白質。
Protein powder and
milk also mean proteins.

蛋白粉
PROTEIN POWDER

牛奶
MILK

5 脫脂牛奶沒有脂質，
但仍是蛋白質線索！
Skimmed milk has no lipid,
but it is still a protein clue!

蛋白質
PROTEINS

脂質
LIPID

脫脂牛奶
SKIMMED MILK

6 細胞膜 = 磷脂 + 蛋白質。
肉、奶、脫脂奶 = 蛋白質。
Cell membrane = phospholipid + proteins.
Meat, milk and skimmed milk = proteins.

細胞膜 = 磷脂 + 蛋白質

肉、奶、脫脂奶 = 蛋白質

細胞膜 → 磷脂 + 蛋白質 / 肉奶 → 蛋白質 /
Membrane → phospholipid + proteins / meat and milk → proteins

1 還有飲料、植物和蔬果線索！

There are also drink, plant and fruit-and-vegetable clues!

2 運動飲料指向礦物質和無機離子。

Sport drinks point to minerals and inorganic ions.

運動飲料
SPORT DRINKS

礦物質
MINERALS

無機離子
INORGANIC IONS

3 植物性食物指向膳食纖維。

Plant-based food points to dietary fibre.

植物性食物
PLANT-BASED FOOD

膳食纖維
DIETARY FIBRE

4 深綠色蔬菜和胡蘿蔔指向維他命和礦物質。

Dark green vegetables and carrots point to vitamins and minerals.

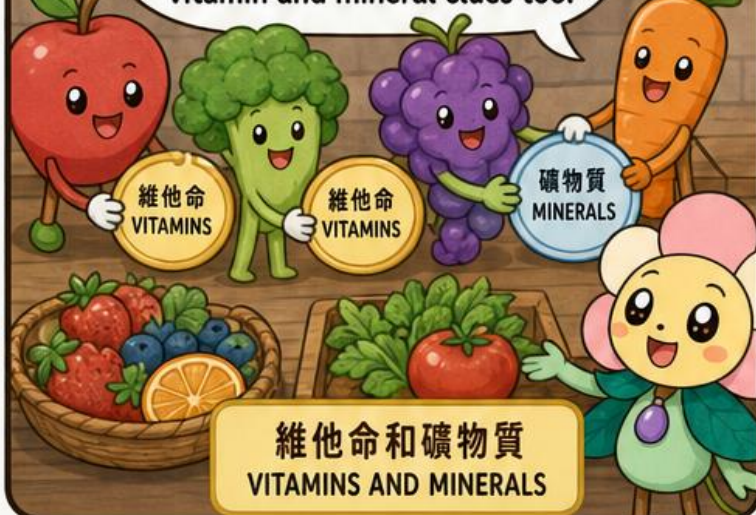

深綠色蔬菜
DARK GREEN
VEGETABLES

胡蘿蔔
CARROTS

5 新鮮水果和蔬菜也是維他命和礦物質線索。

Fresh fruit and vegetables are vitamin and mineral clues too.

維他命和礦物質
VITAMINS AND MINERALS

6 運動飲料考礦物質；植物性食物考纖維；蔬果考維他命和礦物質！

Sport drinks test minerals; plant foods test fibre; fruit and vegetables test vitamins and minerals!

礦物質
MINERALS

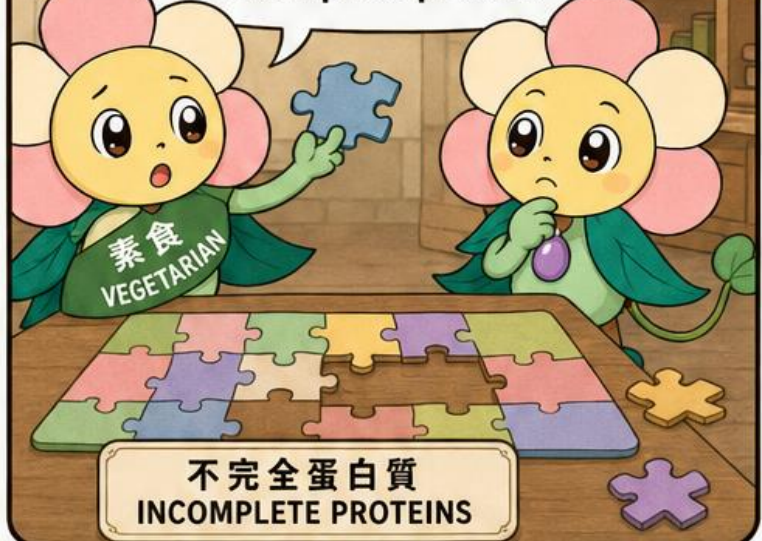

纖維
FIBRE

維他命和礦物質
VITAMINS AND
MINERALS

1 素食蛋白質有一個隱藏重點。
Vegetarian protein has a hidden key point.

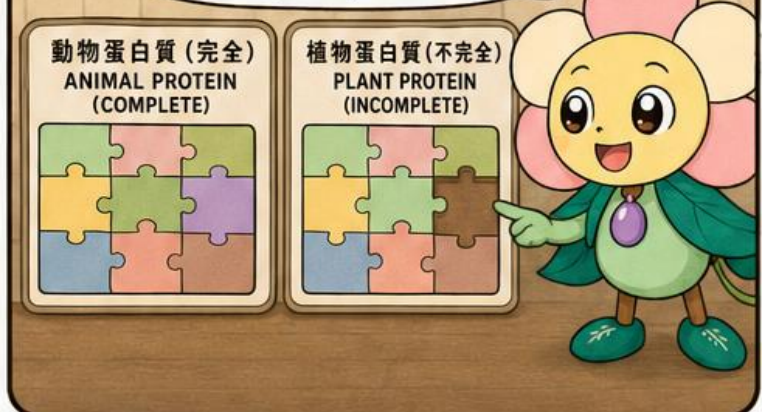

2 它通常是不完全蛋白質。
It is usually incomplete protein.

3 不完全，是因為沒有齊全
9種必需氨基酸。
Incomplete means it does not
contain all 9 essential
amino acids.

4 缺少部分必需氨基酸，
就不能叫完全蛋白質。
If some essential amino acids
are missing, it is not
complete protein.

5 題目提到素食，
就要想到不完全蛋白質。
If the question mentions
a vegetarian diet, think
incomplete proteins.

6 素食 = 不完全蛋白質 =
沒有全部9種必需氨基酸！
Vegetarian diet = incomplete proteins =
not all 9 essential amino acids!

素食 → 不完全蛋白質 → 缺少部分必需氨基酸
Vegetarian diet → incomplete proteins → missing some essential amino acids

- 1 慢着！能量多少要用米飯來比較。
Wait! Compare energy with a bowl of rice.

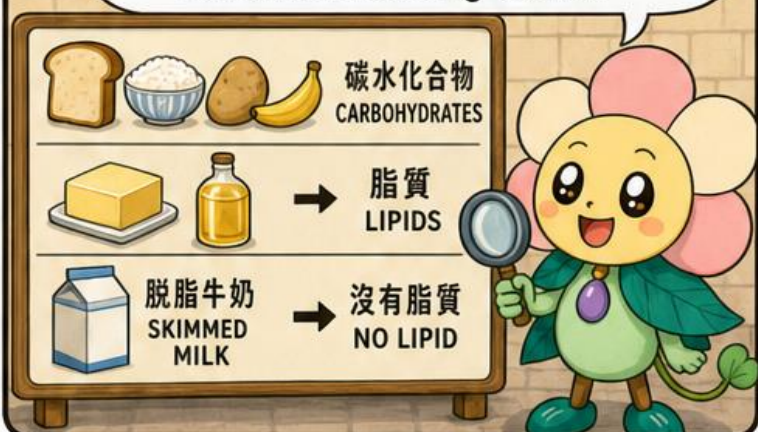

- 2 一碗米飯大約 205 kcal。
A bowl of rice is about 205 kcal.

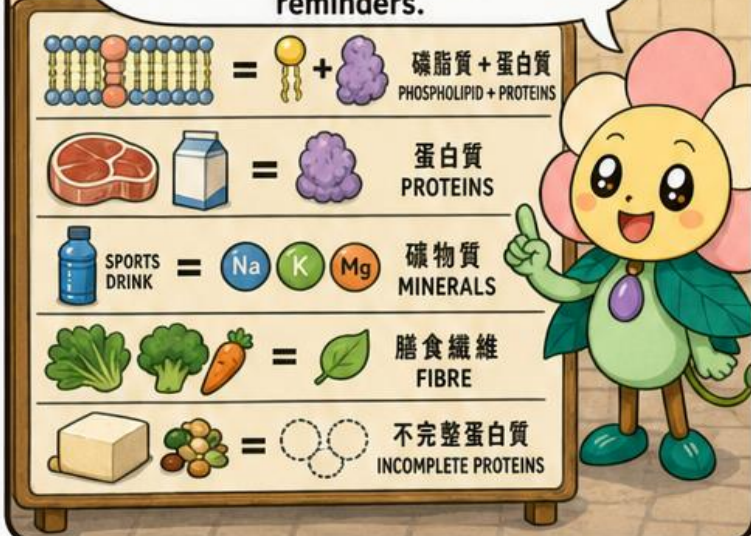

- 3 能量少於米飯的食物，
不要稱為豐富的能量來源。
Do not call a food with less energy than rice a great source of energy.

- 4 食物名稱會洩漏它在考哪一種成分。
The food name leaks which substance is being tested.

- 5 脫脂牛奶、素食蛋白質和
米飯熱量都是例外提醒。
Skimmed milk, vegetarian protein and rice energy are exception reminders.

- 6 解碼食物名稱，就能
拆穿隱藏對話！
Decode the food name, and you can crack the hidden dialogue!
